

Online learning with VSK - Numeracy

VSK have a range of programmes available to support numeracy.

Mathletics covers maths skills and can be used on a Studypad, Chromebook or Laptop. It features work from reception to Year 10. A specific year or years are allocated for a student. They can search on specific topics to work on. For example, a student that struggles with fractions might want to work through all the fraction-related topics if that was a weakness or they can just work their way through the syllabus. Topics can be repeated for extra practice and increased competence. The student can also work on mental arithmetic and times tables skills through Mathletics Live.

Works on iPads, Chromebooks & Laptops.

Maths Whizz is another tool which can diagnose maths gaps so we would normally expect that one or the other programme was chosen, rather than having both. Certain year groups such as Y4-Y6 will be encouraged to take part in Maths Whizz in order to solidify their maths knowledge towards the SATs tests.

Works on Chromebooks & Laptops.

Times Table Rockstars is a carefully sequenced programme of daily times tables practice. Each week concentrates on a different times table, with a recommended consolidation week for rehearsing the tables that have recently been practised every third week or so. This format has very successfully boosted times tables recall speed for hundreds of thousands of pupils over the last 8 years in over 16,000 schools - both primary and secondary - worldwide.

Works on iPads, Chromebooks & Laptops.
